

Mi sources.list

2007-07-06 13:53:38

Este es el contenido de mi archivo /etc/apt/sources.list:

```
##### UBUNTU #####
#
# sources.list generado automaticamente desde:
# http://www.ubuntu-nl.org/source-o-matic/
#
# Cuando un repositorio tiene una llave GPG, es posible que necesites
# agregarla a tus llaves confiables APT. Esto se logra con los siguientes
# comandos:
#
# gpg --keyserver hkp://subkeys.pgp.net --recv-keys KEY
#
# Reemplazando KEY por la clave que te sale en el error al conectarse al
# repositorio.
#
# luego ejecuta
#
# gpg --export --armor KEY | sudo apt-key add -
#
# Reemplazando KEY por la clave que te devuelve el repositorio al usar
# el comando anterior.
#
# Si tienes la llave gpg en una URL, utiliza
#
# wget URL --quiet -O - | sudo apt-key add -
#
# Reemplazando URL con la dirección completa de la llave.
#
# Si tienes la llave gpg en un archivo utiliza:
#
# sudo apt-key add FILE
#
# Reemplazando FILE por el archivo de la llave que te ha dado error al
# conectarse al repositorio.
#
#####
